## 設問例① 独立型問題 Task1

## &lt; 解答例スクリプト &gt;

I respect Mother Teresa with her devotion to the poor people all over the world, especially in India. She once was a schoolmaster of a mission school; however, when she realized that there were many poor people on the street, she started to establish the Missionaries of Charity. The Missionaries has saved and helped people in despair and provided them with food and improved sanitary conditions. Mother was awarded the Nobel Peace Prize. Unfortunately, she died of old age soon after benevolent Princess Diana died. However, her mission is still alive in the Missionaries of Charity.

[Announcement from the President of ALC University]

Due to the request from graduate schools of our university, the faculty members and deans have decided to require those students, who are applying to graduate schools, to take at least three mathematics related courses. Courses include Basic Mathematics, Advanced Mathematics, Statistics, Econometrics, and Matrix. The requirement of taking three mathematics courses is to enhance the analytical abilities of students who will continue further study at graduate schools. According to the faculty of psychology and other non-mathematics related departments, many graduate students are a lack of analytical abilities. Thus, we have decided to include mathematics as a part of mandatory requirements to enroll into graduate schools.

The woman expresses her opinion on the announcement made by the university. Describe her opinion and explain the reasons she opposes the decision.

Preparation Time: 30 seconds

Response Time: 60 seconds

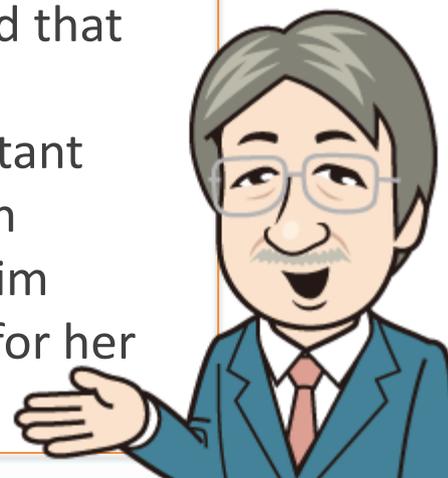

## ★スピーキングセクション

## 設問例② 統合型問題 Task3

## &lt;解答例スクリプト&gt;

The woman expresses her discomfort on the decision made by ALC University. She majors in English Literature and her study is related to the early American writers' writing styles; therefore, she thinks that the new requirement to take mathematics courses is irrelevant to her further study at graduate school. She even stated that Statistics will not help her study. Furthermore, she complains that she may have to give up some important courses she needs to take because taking three math classes will be very hard for her. In summary, her claim concerns whether or not mathematics is important for her graduate work.

## ★スピーキングセクション おすすめ学習法

✓ 独立型問題対策を徹底

⇒ 定型文のテンプレートを活用

⇒ スピーチに慣れる

✓ 読解力とリスニング能力が不可欠

✓ メモは詳細に、解答は簡潔に
